

CONFIDENTIAL

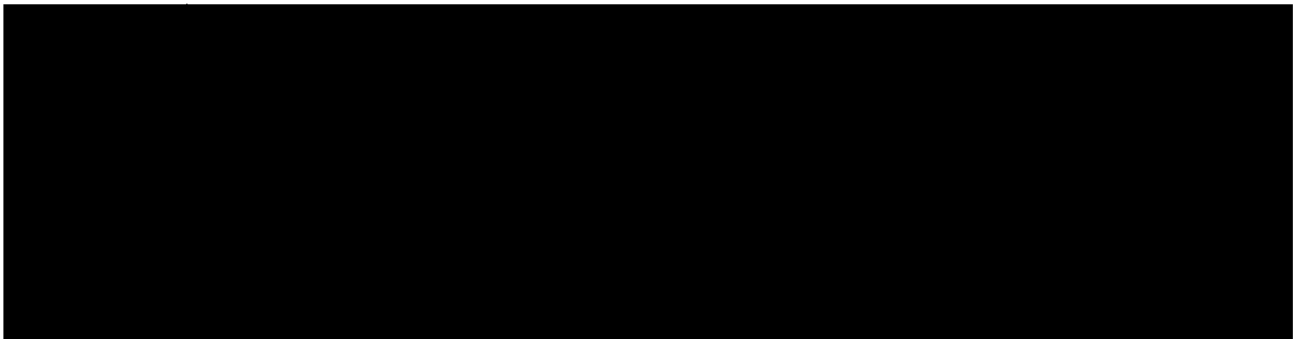

23 February 1972

MEMORANDUM FOR: DC/OS/ALT

SUBJECT : Training Forecasts

1. I have gone over the 1972 training requirements as received from all the divisions, and according to my calculations we have a statistical picture that looks roughly as follows:

25X1A

2. You indicated that you do not expect all these programs to materialize and you may well be right. However, in the above figures I left out those programs which were described as tentative or possible. So it looks as though from the stations' viewpoint you have to count on being pretty well stretched out this year. Do you have any major changes in division plans or station plans since these requirements were first received? I would like to get either your confirmation of these rough figures or your altered version to use as part of my attempt to get some more French-speaking people assigned to ALT.
